

Dr. Matt,

I want to thank you for all that you have done. Before finding you, I was an 81-year young woman that couldn't feel my feet for what seemed like forever. I had many tests prior to finding you and for years had been told nothing was wrong. My husband found your practice in the local newspaper and we thought I'd try just once more to see if something could be done. When we first met you, you were very honest and told us that if you did not think you could help, you would not waste our time or yours. When you did the series of tests on my feet and I failed all of them, my husband and I thought for sure this was not going to work, but it seemed you were up for a challenge. Within just the first 3 weeks I was able to start feeling my feet again, and after my 18th visit my feet feel great! We were so surprised when I passed all the same tests given at my first appointment. If anyone ever asks me for a referral, I would refer them to you with zero hesitation. I would also like to thank your staff for being so nice and making my husband feel welcomed and included while he waited during my appointments. Everyone in the office is amazing and you are all a pleasure to be around. Thank you again for bringing my feet back to life. You have truly been a blessing!

Joann and Rich Ardisana
